

Krishnaveni A

Python Full Stack Developer

Madurai | 9442289542 | akrishnaveni2000@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Detail-oriented IT Master's graduate with hands-on experience in Python, Django, and RESTful APIs. Proven track record in building scalable web applications, integrating OCR technology, and optimizing databases. Skilled in full-stack development, software testing, and delivering clean, secure code solutions.

SKILLS AND LANGUAGES

- Languages:** Python, JavaScript (ES6+), HTML5, CSS3
- Backend Development:** Django, Django REST Framework, RESTful APIs, FastAPI
- Frontend Development:** Bootstrap, jQuery, React.js (Basic)
- Databases:** MySQL, PostgreSQL, SQL
- Tools & Technologies:** Git, GitHub, Visual Studio Code, Postman
- Core Concepts:** OOPs, Data Structures, MVC/MVT Architecture, CRUD Operations, Authentication & Authorization

EXPERIENCE & INTERNSHIP

Software Developer | Protekk Web Technologies LLP

(Sep 2024 – Jan 2025)

- Developed & Deployed:** Built scalable web application modules using Python, Django, JavaScript, HTML, and CSS.
- Security & Testing:** Implemented authentication and security measures, reducing application vulnerabilities through rigorous debugging and API testing.
- Workflow Optimization:** Streamlined code reviews and cross-functional team workflows, improving development cycle efficiency.

Project Intern | COS AI

(Dec 2022 – Apr 2023)

- System Architecture:** Designed and built an Automated Parking System integrating OCR (Optical Character Recognition) models for plate recognition.
- Payment Integration:** Integrated secure payment gateways (UPI, Cards) and dynamic slot allocation algorithms.
- Impact:** Improved real-world parking operations efficiency by **40%** through real-time tracking and automated fee calculation.

PROJECT

Automated Parking Management System (APMS) | Python, Django, OpenCV (OCR), PostgreSQL, HTML/CSS

- Vehicle Identification:** Developed an Automatic Number Plate Recognition (ANPR) system using **OCR technology** for seamless vehicle identification and real-time slot allocation.
- Dashboard & Analytics:** Built a dynamic visual web dashboard for real-time occupancy tracking, automated fee calculation, and peak-hour analytical reporting.
- Payment Integration:** Integrated secure payment processing for Credit/Debit Cards, UPI, and Net Banking with backend database synchronization.

EDUCATION

M.Sc in Information Technology | Fatima College, Madurai | CGPA: 84.5 | (2021 – 2023)

B.Sc in Information Technology | Fatima College, Madurai | CGPA: 74.5 | (2018 – 2021)

CERTIFICATIONS & PUBLICATIONS

- Python Full Stack Development with AI – INNOVEL**
- Research Publications:** Research Paper Publication (IJRPR)
