

Krishnaveni A

Python Full Stack Developer

Madurai | akrishnaveni2000@gmail.com | 9442289542 | LinkedIn

PROFESSIONAL SUMMARY

A detail-oriented Information Technology professional with solid experience in Python-based application development and backend architecture, possessing a proven track record in building and deploying scalable web applications using Django, optimizing database management systems, and implementing secure API functionalities. Experienced in automating complex processes—such as designing an automated system utilizing OCR technology—and integrating robust front-end components, while remaining adept at software testing, debugging, and cross-functional collaboration to deliver clean, efficient, and secure codebase solutions.

SKILLS AND LANGUAGES

- Programming Languages: Python, JavaScript (ES6+) .
- Frontend Development : HTML5, CSS3, JS, Bootstrap, JQuery .
- Technical Core: OOPS, Data Structures.
- Backend Development : Django, Django REST Framework, RESTful APIs.
- Databases: MySQL, PostgreSQL.
- Tools and Technologies : Git, Visual Studio Code
- Microsoft Office : MS Word, MS Excel, MS Powerpoint.
- Tools: CRUD Operations, API Integration, MVC / MVT Architecture, Basic Authentication and Authorization.

PROJECT

Automated Parking Management System (APMS):

- Developed a smart, automated solution to streamline parking management using Optical Character Recognition (OCR), database management, and payment gateways.
- Implemented Automatic Number Plate Recognition (ANPR) for seamless vehicle identification and real-time slot allocation.
- Built a dynamic visual dashboard for real-time tracking of parking availability and automated fee calculation.
- Integrated secure payment processing for credit/debit cards, UPI, and net banking along with analytical reporting for occupancy and peak hours.

CERTIFICATION

- PYTHON- FullStack : INNOVEL

EXPERIENCE & INTERNSHIP

Protekk Web Technologies LLP | Software Developer Intern

(Sep 2024 – Jan 2025)

- Assisted in the development and deployment of web-based applications using HTML, CSS, JavaScript, and Django.
- Implemented targeted security measures to enhance application safety and conducted software testing and debugging.
- Collaborated with team members to significantly improve project efficiency and overall development workflows.

COS AI | Project Intern

(Dec 2022 – Apr 2023)

- Designed an automated parking system, successfully integrating OCR models and payment gateway structures.
- Improved real-world parking operations and overall efficiency metrics by 40%.

EDUCATION

Master of Information Technology | Fatima College, Madurai | CGPA: 84.5

2023

Bachelor of Information Technology | Fatima College, Madurai | CGPA: 74.5

2021
